

USING BLEACH SAFELY

Bleach (also called chlorine bleach, *Javelle Water* or sodium hypochlorite) should not be mixed with other household chemical products because hazardous gases, heat, or explosions may result...

It is most safely mixed only with water.

It should never be mixed with:

AMMONIA in glass/ floor cleaners, wax remover etc.

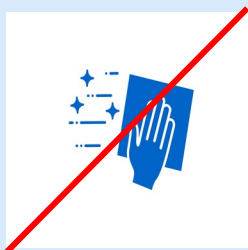

ACIDS such as vinegar, some toilet, tile and concrete cleaners, some drain unblockers, soft drinks such as cola/ lemon juices

ALCOHOLS including alcoholic beverages, or **ACETONE** nail polish removers

HYDROGEN PEROXIDE and other oxygen-based bleaches/ stain removers

OTHER DISINFECTANTS and **CLEANERS** based on quaternary ammonium or chlorine

FUELS, OILS, BRAKE FLUIDS and **ANTIFREEZE**

**Always use these in well ventilated spaces...
...if in doubt, check the bottle label before you pour!**
